PROFESSIONAL SUMMARY

Python Developer and Data Analyst with a B.Tech in AI & Machine Learning (2025) and 6 months of hands-on training at Innomatics Research Labs. Skilled in Python, SQL, Power BI, and Flask, with proven experience building data pipelines, EDA dashboards, and AI-powered web applications. Delivered projects analyzing 3,900+ transactions and cutting retrieval time by 40% across 500+ uploads.

TECHNICAL SKILLS

Languages: Python,Java(Basic), SQL, HTML, CSS, JavaScript
Data Analysis: Data Cleaning, Exploratory Data Analysis (EDA), Statistical Analysis, Business Insights , Data Wrangling, ETL Pipelines
Visualization: Power BI, MS Excel (Pivot Tables, VLOOKUP, Charts), Data Visualization
Databases: MySQL, Relational Databases
Libraries & Tools: Pandas, NumPy, Scikit-learn, Flask, Streamlit, Matplotlib, Jupyter Notebook,GitHub, VS Code

TRAINING

Data Analytics Training Program | Innomatics Research Labs, Hyderabad *Jun 2025 – Dec 2025*

- Created end-to-end analytics pipeline — cleaning, SQL, EDA, and reporting over 6 months.
- Processed structured datasets using Python (Pandas, NumPy) and extracted insights via SQL from relational databases.
- Built Power BI reports to visualize trends and communicate findings to stakeholders
- Conducted EDA on real-world datasets to identify trends, patterns, and outliers.
- Trained and evaluated ML classification and regression models on real-world datasets.

PROJECTS

AI-Powered PDF Question Answering System *B.Tech Final Year — Team Project*

Tools: Python, Flask, Cohere API, Jina AI, Qdrant, MySQL, HTML, CSS, JavaScript

- Developed a web application to enable users to upload PDFs and retrieve accurate answers using natural language queries.
- Implemented vector search using Jina AI and Qdrant, reducing document retrieval latency by ~40% across 500+ PDF uploads.
- Engineered a MySQL-based session history module to let users review Q&A history, cutting support queries by 15%.
- Built a responsive web interface that cut manual document reading time by approximately 60%.

Customer Shopping Behavior Analytics Dashboard *Individual Project*

Tools: Python, Pandas, MySQL, Power BI, MS Excel

- Analyzed 3,900+ transactions via Python & SQL, improving accuracy by 25% and cutting errors by 30%.
- Wrote 15+ SQL queries to extract total sales, customer frequency, and category performance from MySQL.
- Designed Power BI dashboards to visualize customer trends and sales performance.
- Identified 2,518 repeat buyers not enrolled in the loyalty program, supporting a targeted retention strategy.

Personal Finance Tracker Web Application *Individual Project*

Tools: Python, Streamlit, Pandas, CSV

- Architected a Streamlit-based finance tracker with category filters and date-based filtering for daily expense tracking.
- Created a monthly spending summary dashboard showing category breakdowns and savings rate.
- Implemented a CSV export feature that reduced manual record-keeping effort by over 70%.
- Tracked and categorized expenses across 10+ custom categories, reducing manual budget review time by 30%.

EDUCATION

B.Tech — Artificial Intelligence and Machine Learning | CGPA: 7.83/10 *Dec 2021 – April 2025*

Sri Vasavi Engineering College, Andhra Pradesh, India

Coursework: Machine Learning, Deep Learning, NLP, Data Mining, DBMS, Software Engineering

Board of Intermediate Education | CGPA: 8.72/10 *Jun 2019 – Mar 2021*

Tirumala Junior College, Andhra Pradesh, India

CERTIFICATIONS & ACHIEVEMENTS

- ServiceNow Certified System Administrator (CSA)
- ServiceNow Certified Application Developer (CAD)
- Machine Learning for Engineering and Science Applications — NPTEL, IIT Faculty
- Python Programming Certificate — Innomatics Research Labs
- Published: "Stakeholders Feedback System" — IJRASE, Vol. 3, Issue 6 (ISSN: 2582-8118)
